

VIRTUE MICRONEEDLING

POST-TREATMENT

The VirtueRF is designed to minimize social downtime. The skin may appear red for a few hours but the exclusive post-care regimen works to soothe the skin so most will only notice a post-treatment glow. You may experience the following post-treatment which is normal:

- Minimal Pinpoint Bleeding
- Mild redness
- Minimal swelling
- Mild discomfort
- Tingling sensation from anesthetic cream
- Warmth and heat from RF energy
- Sensation of a sunburn

Your next VirtueRF treatment can be scheduled in 4-6 weeks. The recommendation is four sessions and then a maintenance treatment every six months. Your provider can discuss a custom plan to meet your treatment goals.

MICROCURRENT DUAL MASK

Only the VirtueRF pairs every treatment with the most innovative sheet mask technology available – the Microcurrent Dual Face Mask system.

This two mask system soothes skin and eliminates redness. First a wet Enriching Mask infused with antioxidants, vitamins, moisturizing and anti-inflammatory properties is applied to the skin.

VIRTUE POST-TREATMENT

To activate the Enriching Mask, overlay a second dry Empowering Mask that uses patented Tissue X™ technology to deliver ingredients deeper into the skin with an ion induced current.

CLEANSING

Cold water may be used for the 1st day post treatment. After day 1, it is important to maintain clean skin. Be sure to use a simple and gentle cleanser. Do not use excessive pressure when washing. To ensure optimal results from your treatment, your provider will consult with you on best skincare products and practices post treatment.

SUN EXPOSURE / SPF + MAKE-UP

Avoid direct sun exposure for at least 3 days. Should you be outdoors, you can apply a SPF starting 24 hours post treatment. In addition, you may apply makeup 24 hours post treatment - just make sure to cleanse accordingly.

EXERCISE

Avoid exercise and increasing your heart rate for 1 - 3 days post treatment, and per your clinician's direction.
